

Sharpener and file

Version: 01-2011

Electrode sharpener FAVORIT for fast manual turning of impact pointer electrodes

- using normal pressure, turn used electrodes. Directly on machine or gun (in current-free status!)
- Double sided cutting effect
- Rattle-principle, therefore suitable for all machine types
-

Types:

90° double-sided cutting,
up to 21 mm electrode diameter,
construction height 25 mm

120° double sided cutting,
up to 30 mm electrode diameter,
construction height 25 mm

Order-number: XH1.010.001
up to electrode diameter 20 mm and 90°

Order-number: XH1.010.001-001
up to electrode diameter 30 mm and 90°

Order-number: XH1.010.002
up to electrode diameter 20 mm and 120°

Order-number: XH1.010.002-001
up to electrode diameter 30 mm and 120°

Sharpener and file

Version: 01-2011

Electrode sharpener for manual sharpening and filing of Cu-electrodes, that are blunt and dull.

- easy to use as it is possible to work directly at the gun or spot welding machine (without dismantling the electrodes).
- milling knives arranged in pairs opposite each other, allowing for simultaneous and time-saving work on the electrodes (not using current!)

Order-number: XH0.020.001

Electrode file for manual after-working of Cu-electrode tips

Order-number: XH0.010.000

We reserve the right to make changes which are in the interest of technical progress.
