

# ***Insulation protection cover***

Version: 2011-01

## **Glass fibre, silicon free!**

- to reduce leakage and incorrect welding
- as insulation for electrode arms
- adjust themselves to fit the precise shape of the gun
- glass fibre material coated with a highly viscous, non-flow capable polyurethane-propolimer (Cast)
- short processing time, therefore quick repair possible (in operation mode too)
- the hardened material is non susceptible to shocks and is abrasion-resistant
- very good value for money
